

## TJ9PF 2011 by F6KOP TEAM\*

Since more than 10 years F6KOP team had organized one expedition per year: : 5V7C , TO7C (FY), , 5H1C, XT2C, J5C, TK7C, TS7C, TM7CC, IS0R ...

In 2010 we had to cancel a most wanted at the last minute due to a transportation problem; we were very disappointed as everything was ready. But we do not regret tm7cc from Ouessant Island and is0r from Sardaigna Island.

So for 2011 we planned again to go somewhere in Africa. Choosing the correct destination is not easy, it should be a compromise between a country on the most wanted list and security, price and many other parameters.

Most things were ready to go back in Togo 5V, but our Italian friends led by i2ysb have announced their operation as 5v7tt in October 2010, so again we had to organize something else in a very short time.

Very fast, after a discussion with Didier f5ogl, we decided to go in Cameroun (TJ) as there hasn't been any "serious" activity since many years. Cameroun is Nr 67 for club log most wanted list and 96 for dx-magazine.

Then our location was found, the license requested, and after a few emails the team was fully composed in less than a week.

Thanks to our very effective team leader, Franck F4AJQ, everything was ready on time.

The team members are : F4AJQ Frank, F5UFX Seb, FM5CD Michel, N6OX Bob N2WB Wild Bill, K4SV Dave, ON7RN Eric, I2VGV Gabriele, F8BJI Jean Paul, F6ENO Alain, F6BIV Jean-Luc, F5EOT Michel, F5VHQ John, DJ7JC Norbert, F1NGP Yan, F5PED Mathieu, F2JD Gerard.

The Team

Unfortunately some friends were not able to come with us : F9IE on holidays in VK, F6AXX in S7, F2VX who had an accident just 2 days before departure, f1hre, f4egd and f5cwu due to work...

Thanks to the hard work of f6kop team, all equipments were ready on time: 5 stations (the 6<sup>th</sup> is Dave's K3), all computers with Wintest logging software, all antennas and little stuffs...

As our goal was to make a maximum of qso on low bands, our friend f6aoj did a great job by adding an RX antenna input on our yaesu ft-450 and preparing all beverages and our k9ay.

"Antenna Garden"

In the same time, Mat f5ped had just finished his 30m 4sq, and John f5vqh our VDAs antennas.

Bob, Dave and Bill arrived a few days before in Geneva airport, and finally all the team met in Paris on February 10<sup>th</sup>.

After last phone calls with our families and our pilot f6aml we took the plane; 6 hours later we arrived in TJ land. Our first feel was "whaou it is too hot !".

We went through the customs and started to store all our luggage in the small bus. It was nearly full only with all the equipment, but 17 ops needed to find a place in the bus as well. This 2 hours trip to Kribi appears very long for all the team as we were all seated on luggage as we could ...

The hotel was really near the sea, so the location was fine, but we would have expected more place for antennas.

Anyway in about half a day all antennas were almost ready and we could start with 4 stations February 11<sup>th</sup> afternoon. Yann f1ngp was in charge of computing system, Jean Paul f8bjj installed all stations while the rest of the team works outside with antennas.

The internet connection was so slow that it was really a very hard job everyday to upload logs. Pileups were immediately huge with very strong signals coming from all around the world. The last 2 stations have been setup later in the night.

During the whole dxpedition we have been very disturbed by power failure. The backup generator was working fine but wasn't big enough to support all amplifiers at the same time.

On the 4th day, thanks to the sun, SFI was up to more than 100, giving us very nice openings on high bands. We have added a few vertical dipoles directly on the beach so we could operate with all stations on high bands during daylight. On the other hand low bands were very difficult during night time.

The receiving system for low bands has been improved every day, we used many beverages (up to 200m and more) but we had to replace some of them a few times because the wire disappeared...

Days after days we did statistics and meetings with our pilot station f6aml to consider all comments that could help. We tried to give attention to all parts of the world.

During the whole dxpedition the team was in a very good spirit, everybody worked hard, was right on time for radio shifts, etc.. It is the result of many years of work from all f6kop team members.

Only two days before the end we were now far from the digi-qso number world record of ZL8X (previous one belongs to us with ts7c). So we decided to use 3 stations for rtty, one for ssb, one for cw and one as a flex. Everybody was very motivated!

We have been visited by On4cox who now lives in Kribi, and by Lionel tj3sl. The official police also came and checked all our authorisations, licenses: of course everything was OK. We have also been interviewed by two different national televisions.

### Continent By Band

Band	160	80	40	30	20	17	15	12	10	Total
AF	22	71	76	58	183	134	190	137	135	1006
AS	112	129	586	1100	1704	505	333	75	21	4565
EU	1328	1971	2929	3221	6315	6847	10039	4670	2698	40018
NA	572	1742	2457	2045	5535	2789	2983	1418	719	20260
OC	3	0	17	32	102	21	26	17	9	227
SA	15	104	190	113	371	173	285	148	136	1535
Totals	2052	4017	6255	6569	14210	10469	13856	6465	3718	67611

### Our Results

We stopped transmitting on February 20<sup>th</sup> around 1 pm, packed back all equipments and went back to Douala airport.

In Paris we have been welcomed by our friends f6aoj, f1hre, f0ebs, f5iow. After a last coffee all together everyone went back home.

Finally we could not reach our goal of 80 000 Qs due to all power failures and hard conditions on low bands but 68 000 is quit a good score in 9 days, and cherry on the cake we took back our RTTY world record!

Sunset over Antennagarden

We would like to thank all f6kop team members who help in France before, during and after the dxpedition. Mme Bachelet for her great help with the licence, M.Nken and all the hotel Costa Blanca crew, the Le général de brigade Bernard Commins , chef de bataillon Patrice Dange , and the adjudant-chef Denis Bertrand, All cemeroun customs crew, M. Kamgam and M.Loumou from the ART in Yaounde, Our qsl manager Didier f5ogl , Maurice f5nql for all communication, f6aml our pilot station, f4trr our webmaster, Micheline YL-F9IE for the Qsl design, f0ebs and f5iwo for their help with logistics in Paris airport

Thanks to all our sponsors  
 F6KOP, LA VILLE DE PROVINS, SPIDERBEAM, MDXC, INDEXA, CDXC Clipperton Dx Club, UFT, SWODXA, GMDXF GROUP, EUDXF, GDXF, CDXC Chiltern Dx Club, LONE STAR DX ASSOCIATION, NIPPON DX NANCHATE, RFHAM, RBLOB RADIO GROUP, RADIO33, CLUB LOG, REF ED 94, L'AGENCE PARTIR, WIN-TEST, TOP BAND DX Club, REF ED 77

Also big thanks to all individual sponsors

Thank you all for your confidence, we are already working on the next project, see you in the pileup.

F5UFX Seb, on behalf of F6KOP Team.
